🔗 Portfolio: moabner.netlify.app

Education

Federal University of Goiás (UFG) Goiânia, Brazil
Bachelor of Science in Computer Engineering July 2023 – July 2028 (In Progress)
Relevant Coursework: Linear Algebra, Logic, OOP, Data Structures, Algorithm Analysis, Databases, Statistics, Probability

Skills

- **Languages:** C, Python, SQL, JavaScript, TypeScript **Markup:** HTML, CSS, LaTeX
- **Tools & Platforms:** Git, GitHub, Microsoft Office, Jupyter Notebooks, CVAT
- **AI Tools:** Claude (Claude Code), GPT (ChatGPT/Codex), Gemini
- **Core Concepts:** Strong mathematical background, Programming Logic, OOP, Database Management (Modeling, Schema Design, SQL Queries)
- **Soft Skills:** Self-taught, Resilient, Proactive, Adaptable, Curious, Strong Communicator

Languages

English: Reading/Writing – Advanced | Listening/Comprehension – Intermediate | Speaking – Basic to Intermediate (*actively improving through ongoing coursework*)

Courses & Certifications

Artificial Intelligence and Data – Geração Caldeira / ALURA 170 Hours
Foundations of AI/Data Science, large-scale data analysis, and applied predictive and Generative AI models.

Artificial Intelligence Agents (Generative AI) – CEIA / AKCIT UFG 40 Hours
Memory architectures, RAG, and agentic frameworks: LangChain, CrewAI, LangGraph, LangFlow, Mangaba AI.

Skills for Work Full Access – Santander Open Academy / Coursera In Progress
Learning pathways in Artificial Intelligence, Data Analysis, Cybersecurity, and Soft Skills.

Projects

ANEEL RAG — Legal Intelligence for the Electricity Sector *Python, FastAPI, Qdrant, Streamlit*
RAG system for searching and analyzing ANEEL legislation, using agent workflows and semantic search over legal documents.

Zephireo — Smart Glasses *Python, YOLOv8, OpenCV, Flask, Pygame*
Embedded computer vision pipeline for smart glasses, with real-time object detection, proximity classification, and audio alerts for mobility support.

Leadership & Teaching

- **Academic League:** Board Member of the Home Automation & AIoT Academic League, responsible for publicizing and promoting the group's activities.
- **Lead Organizer & Instructor – DGX Spark Lab:** Assist a professor by preparing and coordinating materials to teach the campus community about AI models and the university's DGX Spark lab infrastructure, with content reviewed by the professor.
- **Peer Teaching:** Led Computer Vision study sessions for a student group, teaching core concepts and practical applications.
- **Mentor:** Guide incoming freshmen through coursework and academic life as part of the university's mentoring program.

Extracurricular Activities

- **Community:** Active member of tech/AI communities in Goiás, participating in study groups focused on Computer Vision, NLP, and MLOps.
- **Volunteer Work:** Represented CEIA at the IA Brasil Experience event, presenting research/projects and answering inquiries about CEIA and AKCIT initiatives.
